

I have been informed that because of LPFM service, Air1 could be forced off the air.

I would hate to see this happen because AIR1 on 88.7 in Phoenix provides an alternative positive listening experience for my age group. My friends and I love rock music, but the lyrics on the mainstream stations promote violence, drugs, and illicit sex. With AIR1, which we listen to almost exclusively, provides our age group great music and it has a positive message which helps us live a better life. Without AIR1, we have no alternative. It is a radio station that the listeners totally support financially. AIR1 is on the air because people like myself pay their bills to stay on. Monthly, the listeners of AIR1 send their hard earned money so that they can stay on the air. Please don't jeopardize AIR1 by believing that there is little value in the service they provide. Thank you!
